

Maintenance Instructions For Your Linco Laminate Floors

Maintenance Information

12mm Wood Expressions, 12mm Sierra Collection , 12mm Lighthouse Collection, 8mm Madera Collection laminate floors require proper care to keep them looking their best.

Regular Maintenance

The following simple steps are usually all it takes to keep your floor clean.

- For general dry cleaning, use a dry, dust mop (ie. Dry Swiffer) or wipe occasionally with a cloth mop.
- For heavier cleaning, use Laminate Floor Cleaner and immediately wipe dry. If an accident occurs, immediately wipe dry the surface, and if a stain remains, you can remove the worst stains with acetone or denatured alcohol on a soft cloth without bleaching or damaging the floor. Do not use soap or detergent-based cleaners, wax-based products or any type of polish, as they leave a dull, filmy residue.
- There is never a need to wax or refinish your laminate floors.

Protect the Floor

Laminate floors are scratch-resistant but not scratch-proof. While laminate floor is remarkably durable, there is of course no such thing as an indestructible flooring material. There are a few simple protective measures that are important to keep your floor looking new.

- To protect your floor from surface scratches, place walk-off area rugs or mats inside any exterior doorway to collect small bits of gravel that may track in on shoes.
- Use felt floor protectors on the legs of chairs, sofas, TV stands, tables and other easily movable furniture.
- Replace plastic casters on chairs with rubber wheels and lift rather than slide heavy objects across the floor.

Spot Removal

When the inevitable happens, use the following guide for stain and spot removal:

- For chocolate, grease, juice, cordials and wine - use any Laminate Floor Cleaner.
- For tar, markers, crayon, lipstick, oil, shoe polish, ink, nail polish and cigarette burns - use acetone/nail polish remover or denatured alcohol.
- For candle wax and chewing gum - let harden and scrape carefully with a blunt plastic scraper.
